

Ana Enders

www.anaenders.com • ana.enders@gmail.com

I am a website developer interested in user interfaces and website implementation. Most of the sites I've worked on live on the Rails framework, in which I write web compliant views in HTML, HAML, CSS, SASS, JavaScript (primarily through JQuery), and basic Ruby. Due to my basic understanding of Object Oriented Programming and my personal interest in programming languages, such as Java, Ruby and Python, I feel comfortable tinkering with frontend code written by other

developers. All the while, I am a designer and creative at heart, which I express primarily through Photoshop. My design intuition and experience as a developer have made me particularly qualified to do site-wide QA testing on various platforms and operating systems. In short, I am the pixel-perfect attention-to-detail glue between the design and engineering teams using my skills to facilitate and contribute to both worlds.

Education	University of Waterloo - Online Course for Professional Development	Online
	• Certificate of Completion for Intermediate Java Programming	March - May 2011
	• Certificate of Completion for Introduction to Java Programming	Jan - March 2011
	Parsons School of Design	New York, NY
	• Completed one year of the two year M.F.A. in Design + Technology	2007 - 2008
	Carnegie Mellon University	Pittsburgh, PA
	• B.A. Music Performance / European Studies	Dec 2005
	Centre International D'Études Français	Angers, France
	• Certificate in Intensive Language Studies in French	Summer 2005
Skills	<ul style="list-style-type: none">• HTML, HAML, CSS, SASS• Strong design intuition with the ability to produce high quality design solutions• Experienced coding views on Rails framework with basic Ruby and JavaScript knowledge• Pixel perfect and detail oriented• Site wide quality assurance testing on various browsers and operating systems• Expert at Adobe Photoshop	
Experience	THE DAILY MUSE – SENIOR FRONTEND ENGINEER	NY, NY / SF, CA
	As the frontend engineer, I design and implement features for The Daily Muse and collaborate with the backend engineer focusing primarily on The Company Muse job board.	July 12 – Current
	INTERSECT, NYC - FRONTEND ENGINEER	New York, NY
	As a member of the development team, I worked closely with designers, backend programmers, and software engineers in producing custom sites and content management software.	Sept 08 – Sept 11
	CREATIVELAB - DESIGN INTERN	Brooklyn, NY
	In addition to being a photo shoot and set design assistant, I worked on image post production and editing, logo design, graphic design, web design and web development using Photoshop and Flash.	Summer 08
