

Ana Enders

www.anaenders.com • ana.enders@gmail.com

I am a website designer and developer interested in user interfaces and website implementation. My experience ranges from the design phase to frontend engineering. I have formal training in design and am well versed in graphic tools such as Photoshop and Illustrator. Most of the sites I've worked on live on the Rails framework, in which I write web compliant views in HTML, HAML, CSS, SASS, JavaScript (through JQuery), and basic Ruby. My personal interest in programming

languages has led me into the world of Java, Ruby, Python, and PHP/MySQL, learning the basics of Object Oriented Programming, which has made it possible for me to tinker with frontend code written by other developers. I have also become a site-wide QA expert on various platforms and operating systems. In other words, I am a pixel perfect attention to detail kind of gal.

Education University of Waterloo - Online Course for Professional Development

- Certificate of Completion for Intermediate Java Programming
- Certificate of Completion for Introduction to Java Programming
